Copilot Studio Governance & Compliance Framework

Scale AI Securely and Responsibly

As Copilot adoption grows, organizations must balance innovation with security, compliance, and responsible AI practices. This framework ensures your Copilot Studio deployments are enterprise-ready and scalable.

What's Included:

Governance Assessment:

Review your Copilot Studio environment, security posture, and compliance readiness.

Policy Framework:

Define roles, permissions, and lifecycle management for Copilots.

Compliance & Risk Controls:

Implement data loss prevention (DLP), responsible AI guidelines, and audit processes.

Operational Playbook:

Best practices for monitoring, versioning, and continuous improvement.

Optional:

Expand into a broader Power Platform governance engagement.

Outcome:

Organizations gain a clear governance structure for Copilot Studio, reduced compliance risk, and an operational model for sustainable Copilot adoption.

Duration: 3-4 weeks
